## Holemaker Silver Series Annular Cutters

### M2AL HIGH SPEED STEEL MATERIAL

M2AL High Speed Steel is a high alloy material with a hardness of up to 67.5 HRC, designed for increased endurance of the cutting edge and tool life.

### STEP HARDENED PROCESS

This state of the art manufacturing process produces cutters with extremely hard tooth tips for increased cutter performance, while maintaining a softer body which is less susceptible to breakage than standard high speed steel cutters.

### MULTI-CUT GEOMETRY

Provides smooth and fast cutting, with decreased chatter. This also increases the cutters ability to remove swarf away from the cut, and helps to enhance centering.

### FULLY GROUND WITH INTERNAL RELIEF

This feature allows Holemaker cutters to produce reamed quality, burr-free holes and also helps to reduce torque and horsepower requirements.

### UNIVERSAL SHANK

19.05mm (3/4") Universal Shank with 2 flat sections to suit most magnetic base drilling machines.

### PILOT PIN DIAMETER

6.35mm (for 25mm DOC use SP16003, for 50mm DOC use SP16004)
